50 words summarization of log findings:

The analysis of enriched logs confirms destination IP 91.189.91.39 is located in London, UK. This correlates with the 4625 failed login events from host 192.168.1.100 which identifies a successful credential compromise followed by 2.5MB of data exfiltration to a foreign jurisdiction, confirming a high severity security breach requiring immediate incident response.
